

## Natural Ophthalmics, Inc

### Help Your Cataract Patients Avoid Surgery with Clinically Proven Eye Drops !!!

#### Dr. Collins says...

“You’ll generate \$50.00 from the eye drops and get office visits paid for by medicare. This is probably the easiest marketing tool you have to bring in new patients - just advertise this cataract treatment & all those who are waiting for surgery just might make an appointment. Increased office visits, referrals and revenues.”

**How?** After diagnosing cataract, simply dispense the clinically proven Cataract Eye Drops with Cineraria, and schedule a follow up exam in seven to nine months (after approx. three bottles of drops).

#### Cataract Eye Drops with Cineraria

Professional Quality - only Available Via Doctors

**Overview:** Cineraria maritima has successfully been used homeopathically for over one hundred years to safely and effectively treat cataract. It is a treatment of choice in Europe, India and South America. Natural Ophthalmics has improved it by converting it to a 5x homeopathic potency and including six other proven homeopathic ingredients.

**Description:** Homeopathic eye drops: Sterile, non-preserved, pH balanced, isotonic ophthalmic solution containing seven homeopathic active ingredients, micro-diluted and homeopathically potentized between 5x and 11x. No Sting. Safe for pregnant women & children. Okay for use with contact lenses in place. There are no known side effects.

**Treatment strategy:** There are no blood vessels to the crystalline lens and the lens is comprised of living cells which need oxygen, nutrition, detoxification and anti-oxidation. Our treatment strategy is to stimulate and support the body’s tissues, organs and functions which keep the lens healthy. Homeopathic Cineraria is a safe lymphagogue and gently triggers the body’s mechanisms to maintain a clear crystalline lens. The “Total Ocular Function Spray” provides important nutrients and powerful antioxidants for the lens (see below). Surgery may be delayed or eliminated.

**Directions:** One to three drops in affected eye/s three times per day for six to nine months (approximately three bottles) before evaluating the cataract. These drops should be administered at least five minutes before, or after, other prescribed drops. These drops also contain Euphrasia (Eyebright) which is extremely effective for relieving dry, red, sore & tired eyes. Patients can use the drops throughout the day as needed.

**Indications:** Cataract. **Contraindications:** None known.

**Drug interactions:** None known. **Size:** 15 ml

#### Ingredients:

- Cineraria maritima HPUS 5X: Cineraria acts as a safe lymphagogue, increasing

**Indications:** Cataract. **Contraindications:** None known.

**Drug interactions:** None known. **Size:** 15 ml

**Ingredients:**

- Cineraria maritima HPUS 5X: Cineraria acts as a safe lymphagogue, increasing circulation in the intraocular tissues, also stimulating circulation and normal metabolism. \*
- Euphrasia (Eyebright) HPUS 6X: Is the most widely used natural ingredient for the eye and is often referred to as a “tonic for the eyes.” It is indicated for cataract with watery eyes, opacities of the cornea after injury, pain in the eye, dryness, redness and edema, itching, burning of the eyes and lids.\*
- Causticum HPUS 6X: Indicated for cataract with motor disturbances, eye pain with inclination to rub eyes, vision obscured as from gauze, sparks or dark spoys before the eye. \*
- Silicea HPUS 10X: Indicated for spotted vision, cataract, opacities, keratitis. \*
- Sepia HPUS 6X: Indicated for the symptoms of glare, black spots, veils, points, sparks, flashes and streaks of light. Cataract. \*
- Calcarea flourica HPUS 11X: Indicated for cataract, corneal opacities, keratitis, flickering and floaters. \*
